

Electrical Engineer - Guernsey

AFM are recruiting an **Electrical Engineer** to join our busy team.

Covering a wide range of electrical systems both in the commercial and domestic environments, the key activities of this role include reactive response, fault finding and diagnostics, installations, testing and inspection, planned preventative maintenance and defect repairs.

Key Responsibilities:

- Fault finding, diagnostics and repairs on various forms of electrical and mechanical services, such as; LV Electrical Systems, Air Conditioning, Ventilation, Pumps, Motors, BMS/Controls, Automatic Doors/Garage Doors/Gates and Lighting systems
- Electrical installation works associated with above (new installs and refurbishments)
- Testing and inspection, surveys and reports
- Fire and Security (1st and 2nd fix)
- Liaising with third party contractors and coordinating minor works when necessary
- Planned Preventative Maintenance works including the provision of site information/asset verification in conjunction with Maintenance Division and defects repairs
- Quality standards throughout AFM and compliance with legislation/best practice

Qualifications

Essential

- City & Guilds Electrical Qualification (or equivalent)

Additional info for this role:

- This is a full time position
